

Hemasri Kalaiselvan

Experienced Technology Professional

Chennai, India | vsk5587@gmail.com | linkedin.com/in/hemasri-kalaiselvan | github.com/hemasri-kalaiselvan

PROFESSIONAL SUMMARY

Experienced technology professional with 15+ years in the IT industry, with a strong background in Mainframe and Big Data. Skilled across development and production support, with a track record of building and enhancing enterprise components, automating recurring tasks, and resolving complex issues. Currently expanding into Artificial Intelligence and emerging technologies through practical, project-based learning.

CORE SKILLS

Enterprise Technologies: COBOL, JCL, DB2, VSAM

Data Technologies: Hadoop, PySpark, Hive, Oozie, HBase, Shell Scripts

Development: HTML, CSS, JavaScript, React, Git, GitHub

Artificial Intelligence (Exploring): ChatGPT, Claude, Wispr Flow, Replit, Lovable

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)

Developer & Production Support | Chennai | Sep 2009 – Jun 2026 | Domains: Banking, Retail

Technology areas: Mainframe, Big Data

DEVELOPMENT

- Component development and enhancements
- Defect fixes and unit testing
- UAT deployment and UAT batch execution
- Production deployment and post-deployment monitoring

PRODUCTION SUPPORT

- Ticket handling, issue analysis and resolution
- Batch monitoring and bug fixes
- Component enhancements and deployment

KEY CONTRIBUTIONS

- Component creation and application enhancement
- Task automation of recurring production support activities
- Root cause analysis of recurring issues

ACHIEVEMENTS

- Built an automated monitoring job running every 15 minutes that flagged failed, long-running, and SLA-breaching jobs via email - enabling the team to act immediately and keep batches within SLA. Received an Appreciation Award for the same
- Automated recurring reports with a job that reads files, generates Excel output, and emails it directly - replacing manual checks and data entry
- Introduced input-check flags that skipped downstream jobs when input was empty, avoiding unnecessary CPU usage and reducing processing costs
- Developed a job to monitor critical workflow checklists and alert on abnormalities via email, catching batch issues early

PROJECTS

VetriHub - Personal Utility Website

- Designed, built, and maintains a personal utility website bringing together practical everyday tools under one roof.
- Current tools include a Cycle Tracker, a Recipe utility, and a Situations & Solutions reference.
- Built to be simple to use and straightforward to extend with new utilities over time.

CERTIFICATIONS

- AI Tools Workshop - be10x (August 2026)
- AI Prompts Fundamentals - Coddy (August 2026)
- Generative AI Mastermind - Outskill (August 2026)
